

## Safety Leadership 2-Day Course Foundation for Managing Safety

### Who should attend?

This workshop is designed for:

- Leaders of people
- Managers
- Supervisors

This two-day course is run as a small and interactive group. It will provide proven tools and techniques and give participants the confidence through practical exercises to become a better safety leader.

### Dates:

21<sup>st</sup> and 22<sup>nd</sup> February 2024

### Venue:

Safety Action, Clayton

Please [email](#) us for more information of [book now](#).

### OVERVIEW:

Managers and supervisors have significant obligations under workplace safety legislation. In addition, they are expected to provide the necessary leadership to continually encourage compliance and achieve the various business objectives.

All safety leaders require specific training to; fully understand their leadership role, master use of the tools and techniques for safety leadership and to hone their skills in a "safe" learning environment.

This course will provide a proven process and techniques and give confidence through numerous practical exercises for participants to become true safety leaders.

### CONTENT:

- Safety law & obligations
- Safety myths & compliance
- Introduction to safety culture
- Safety leadership principles & tips
- Effective communication skills
- Building a strong safety culture
- Motivating safe practices
- Leaders role in safety investigations & inspections
- Verifying a safe workplace
- Risk assessments
- Managing contractors & SWMS

Training/2024/SL Feb/SL outline
