

## Risk Assessments

**Workplace Safety Assessments** are required for a variety of activities including; plant risk assessments, chemical assessments, manual handling risk assessments, traffic management assessments, falls from heights, confined space entry and many more.

### Typical Types of Safety Assessments

Safety Action can conduct or facilitate a wide range of workplace safety assessments to help you deliver your safety business plan or to demonstrate to stakeholders that the results have been determined through an independent assessment.

### Skills Transfer Process

The Safety Action team like to share their skill and knowledge with other people, and often coach client personnel during risk assessment exercises. We can discuss your needs in this area with any projects you may have in mind.

### Benefits of Workplace Safety Assessments

By using Safety Action's professional service you will have;

- A qualified and experienced professional lead the assessment
- A high quality & fully documented risk assessment
- Risk assessments compliant with all relevant legislative requirements
- Identification of all likely hazards and risk exposures, derived from our expertise, resources and wide industry experience
- Access to our effective and friendly process, which encourages input from your personnel on local issues, incidents or their experience
- Consultation built into the process, as required by legislation, without any preconceived ideas or personal prejudice

### Why Use Safety Action

Safety Action is widely regarded as one of the premier providers of workplace safety services, and we have completed risk assessments for many of Australia's leading organisations including GlaxoSmithKline, Qantas, Toyota Australia, Cadbury Schweppes, Fosters, Visy and many more.
